Complete Performance
Testing Tools and
Solutions for eBusiness

Enterprise-Class applications have one thing in common....

TO BE THERE.. FOR EVERY CUSTOMER.. EVERYTIME..

And this is one domain where *Perception* of quality is paramount. "Is your Application performing well enough?"

Performance.. This is our world.. Regardless of Component, Complexity or Metric, critical emphasis on *Quality of Service* is how we define "eBusiness Class".

We have Expertise and Technology that scales new heights to deliver eBusiness Applications..

Frequently Asked Questions

- How many users does the *System* support ?
- Are *System Response Times* acceptable ?
- Is the *System Optimized* ?
- Do users see *Denial of Service* problems ?
- Is the *System Crash Resistant* under heavy loads ?
- How do I fix my Application to meet set expectations ?

We got all it takes to make the rubber meet the road with customizable technology to solve every eBusiness problem in the world today. Apart from answering these questions, we often solve problems with no definition, but only with symptom. Read on and find out how..

WebSizr/WebCorder - WebSuite

Our Web Suite of tools are used to test and optimize eCommerce applications. While a majority of our customers are into Banking, we have dealt with problems related to every major vertical market, from Bookstores to Transportation.

With a range of capabilities, which include dealing with the most advanced functional areas of the HTTP protocol, we solve problems, whether they are in User Registration or User Buyer Flow. Security, Authentication, Cookies, Support for JavaScript and Java, all in there....

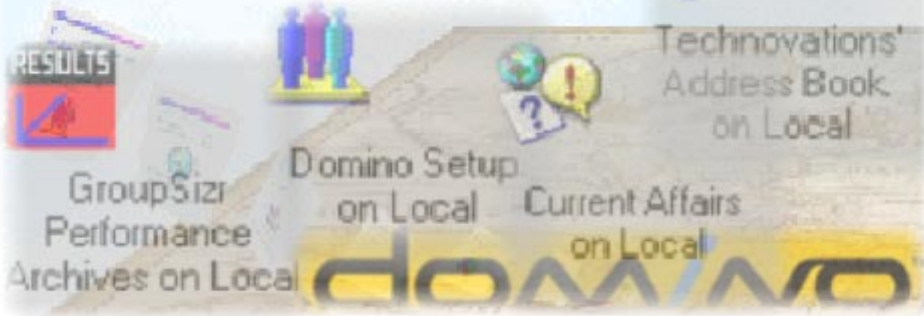

We have the know-how to power up your Web Server and Application, regardless of Branding, the Operating System or the Hardware on which it runs.

Lotus Domino

Lotus

Notes

GroupSizr/ NotesSuite

Newer versions of Domino are packed with lot more functionality than their predecessors. But only our specially created NotesSuite tools can validate how Domino responds to load, whether they are from Notes clients, Web Browsers, Email Clients, the works.. GroupSizr typically simulates thousands of users, and being packed with advanced features important to Domino users, is the defacto standard for advanced Domino Performance testing and Capacity Planning. Now leading the charge against R5 and beyond...

MailSizr/NetCorder - MailSuite

In a world where Email is the most common vehicle, there is an insatiate need to have your messaging infrastructure running around the clock. And with the widespread acceptance of Internet Messaging standards like IMAP embedded into newer versions of Server side products, how can a Business make sure that access is as ubiquitous as advertised ?

MailSuite to the rescue; simulating thousands of email users and being agnostic to vendor hardware, Operating System or Server.

Internet Messaging

Databases

DbSizr/DatabaseSuite

In today's world of data, boundaries are only imaginary.. Sharing data securely, interoperatively and reliably among a wide range of client programs is key. Our DatabaseSuite of products are meant to not only check out the scalability of the repository solution, but also to pinpoint specific areas of client SQL code where small enhancements can lead to quantum jumps of Performance improvement.

Compatible across most of the popular Relational Databases of today, the typical model is to simulate thousands of database clients concurrently accessing the repository.

We are the One Stop for Custom Solutions

Creating Low Cost, Optimal eBusiness Solutions

Enterprise Testing brings on a set of challenging Problems.

Conventional Tools address only a subset and such Solutions are loaded with Hidden Costs.

We design solutions to provide the *lowest unit cost* that are proven to completely test a wide range of eBusiness Applications. Such completeness of testing delivers optimal solutions and *minimizes production down-times*.

Another important ingredient of cost lies in the licensing packages. From Annual Licenses to License Rentals, Thin Function Editions to Enterprise Editions of products, we deliver the widest range of customizable options to flex to your specific needs and budget constraints.
